# Industry Challenges

## Low Level of Trust

It is increasingly difficult for new projects to gain a high level of trust from users, especially in the crypto industry.

## Low Level of Product Knowledge

Continuous development and improvement of a product makes no sense if users are unaware of its existence or functionality.

## Absence of Personal Relationship

Projects are increasingly complex – this affects direct communication with the audience, resulting in user churn.

## Monetization Issues

Finding ways to monetize can be a challenge for many content creators and projects.

## Outdated Communication Channels

Most users prefer to watch or listen to information about new products rather than read it.

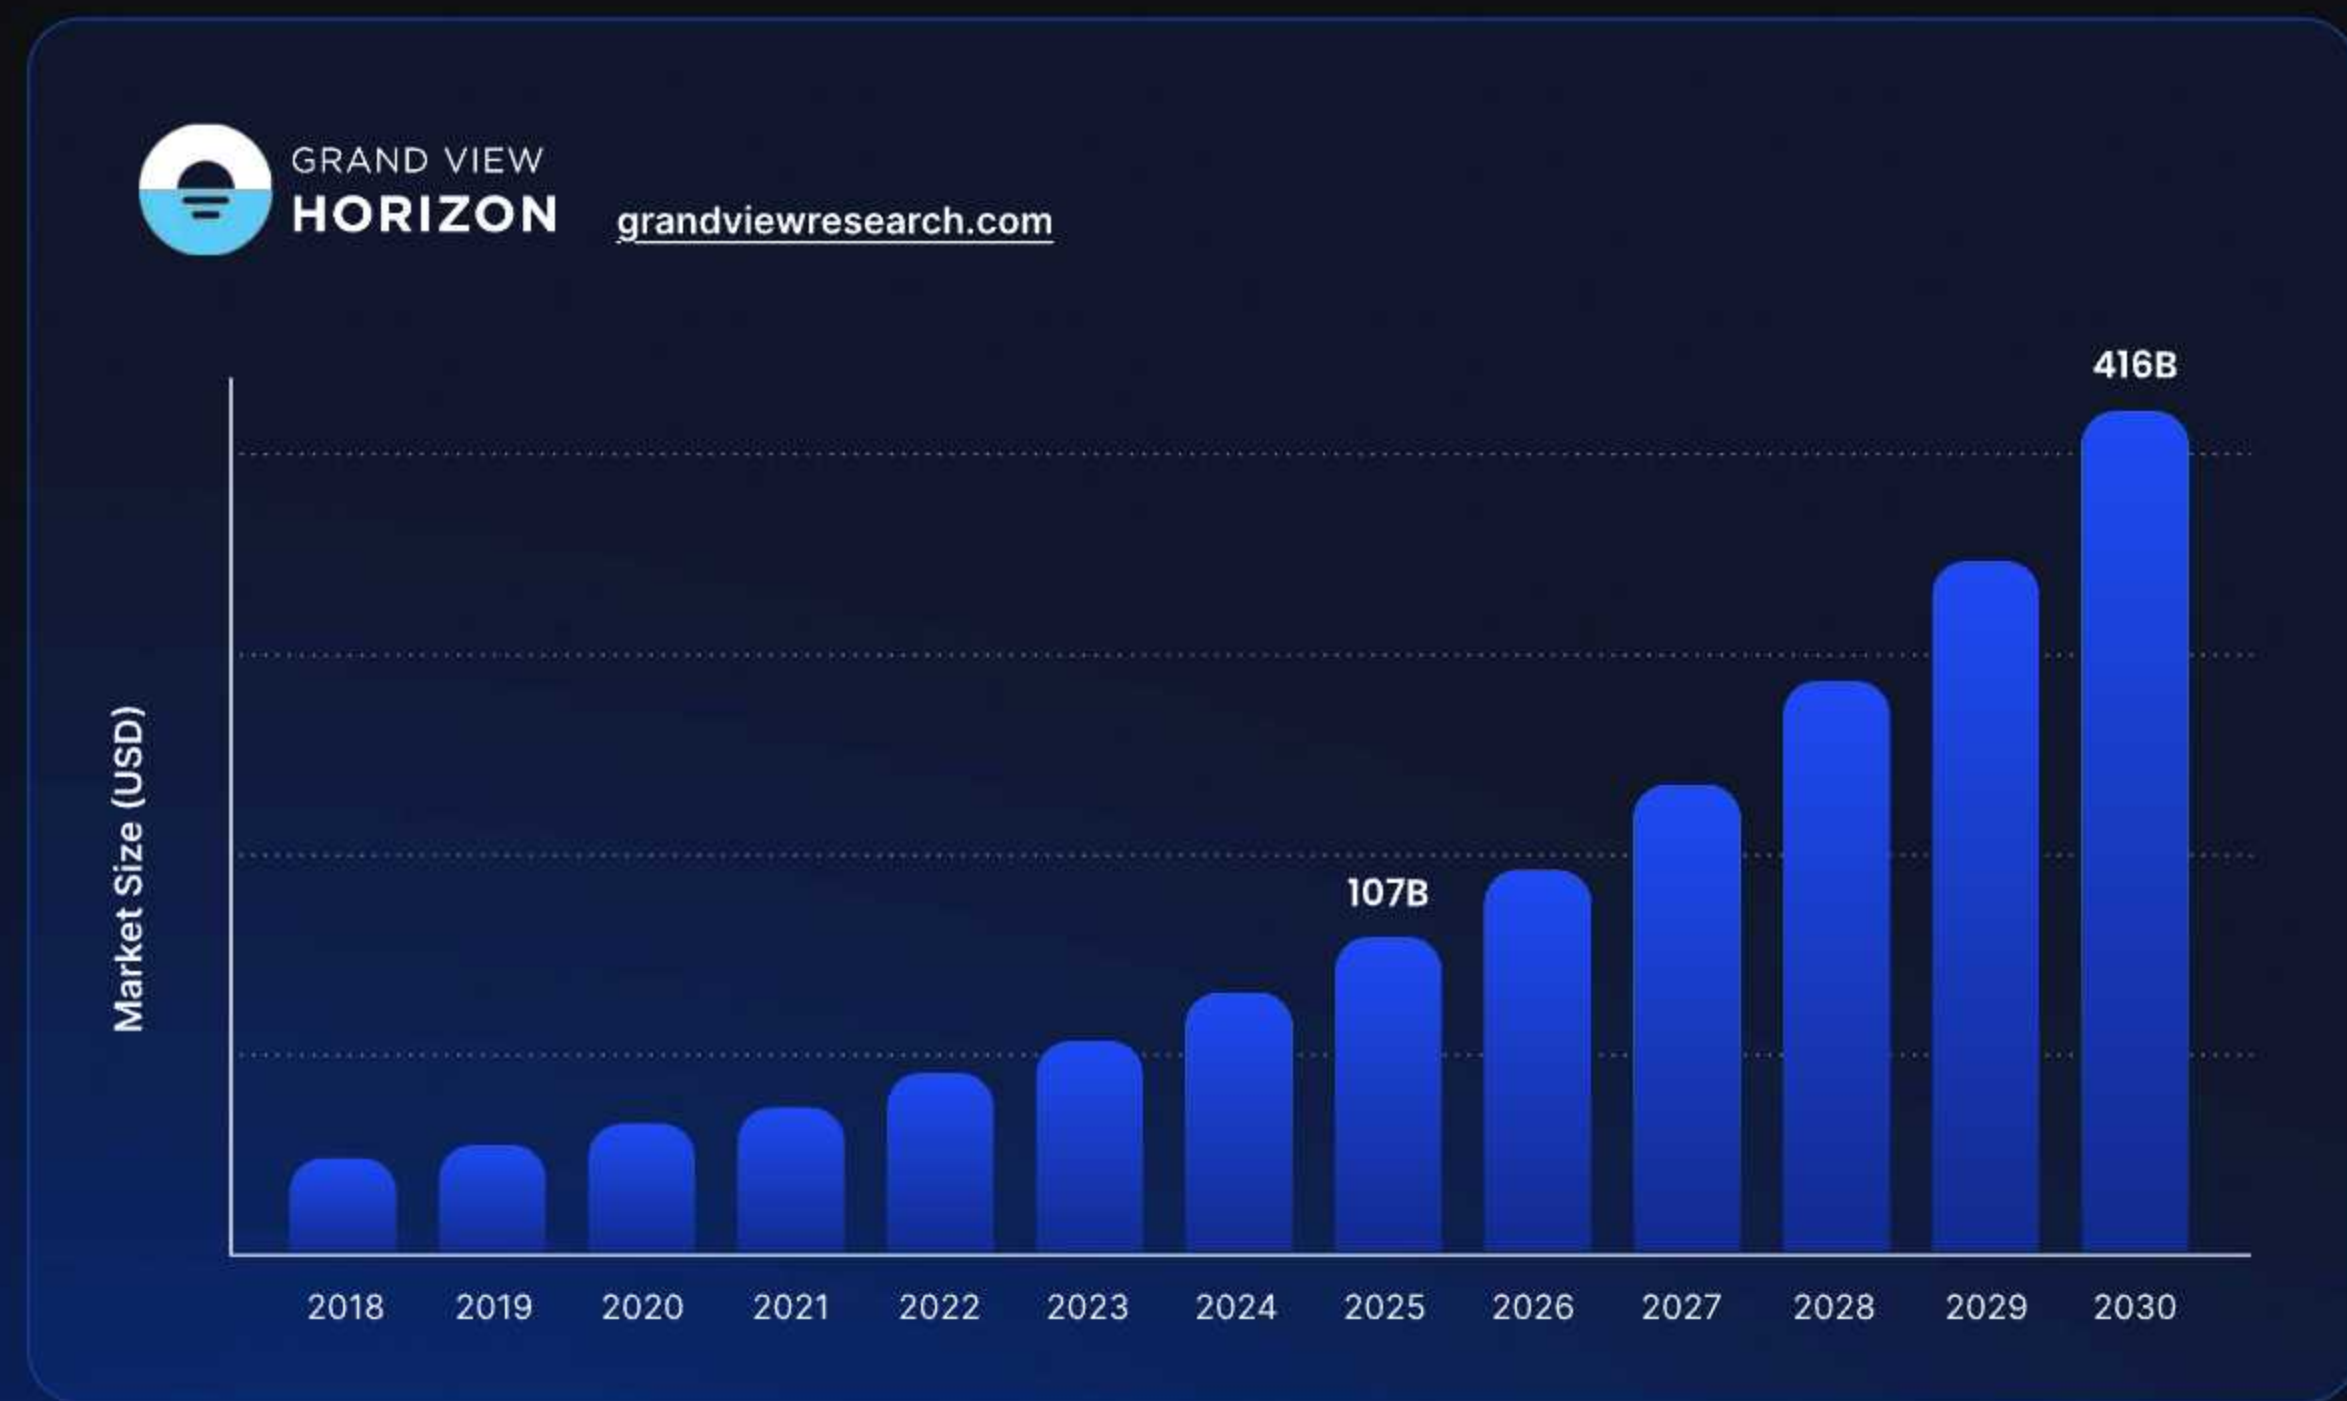

## Low User Engagement in SocialFi

In SocialFi projects, unclear benefits or insufficient rewards often result in low engagement and high churn.

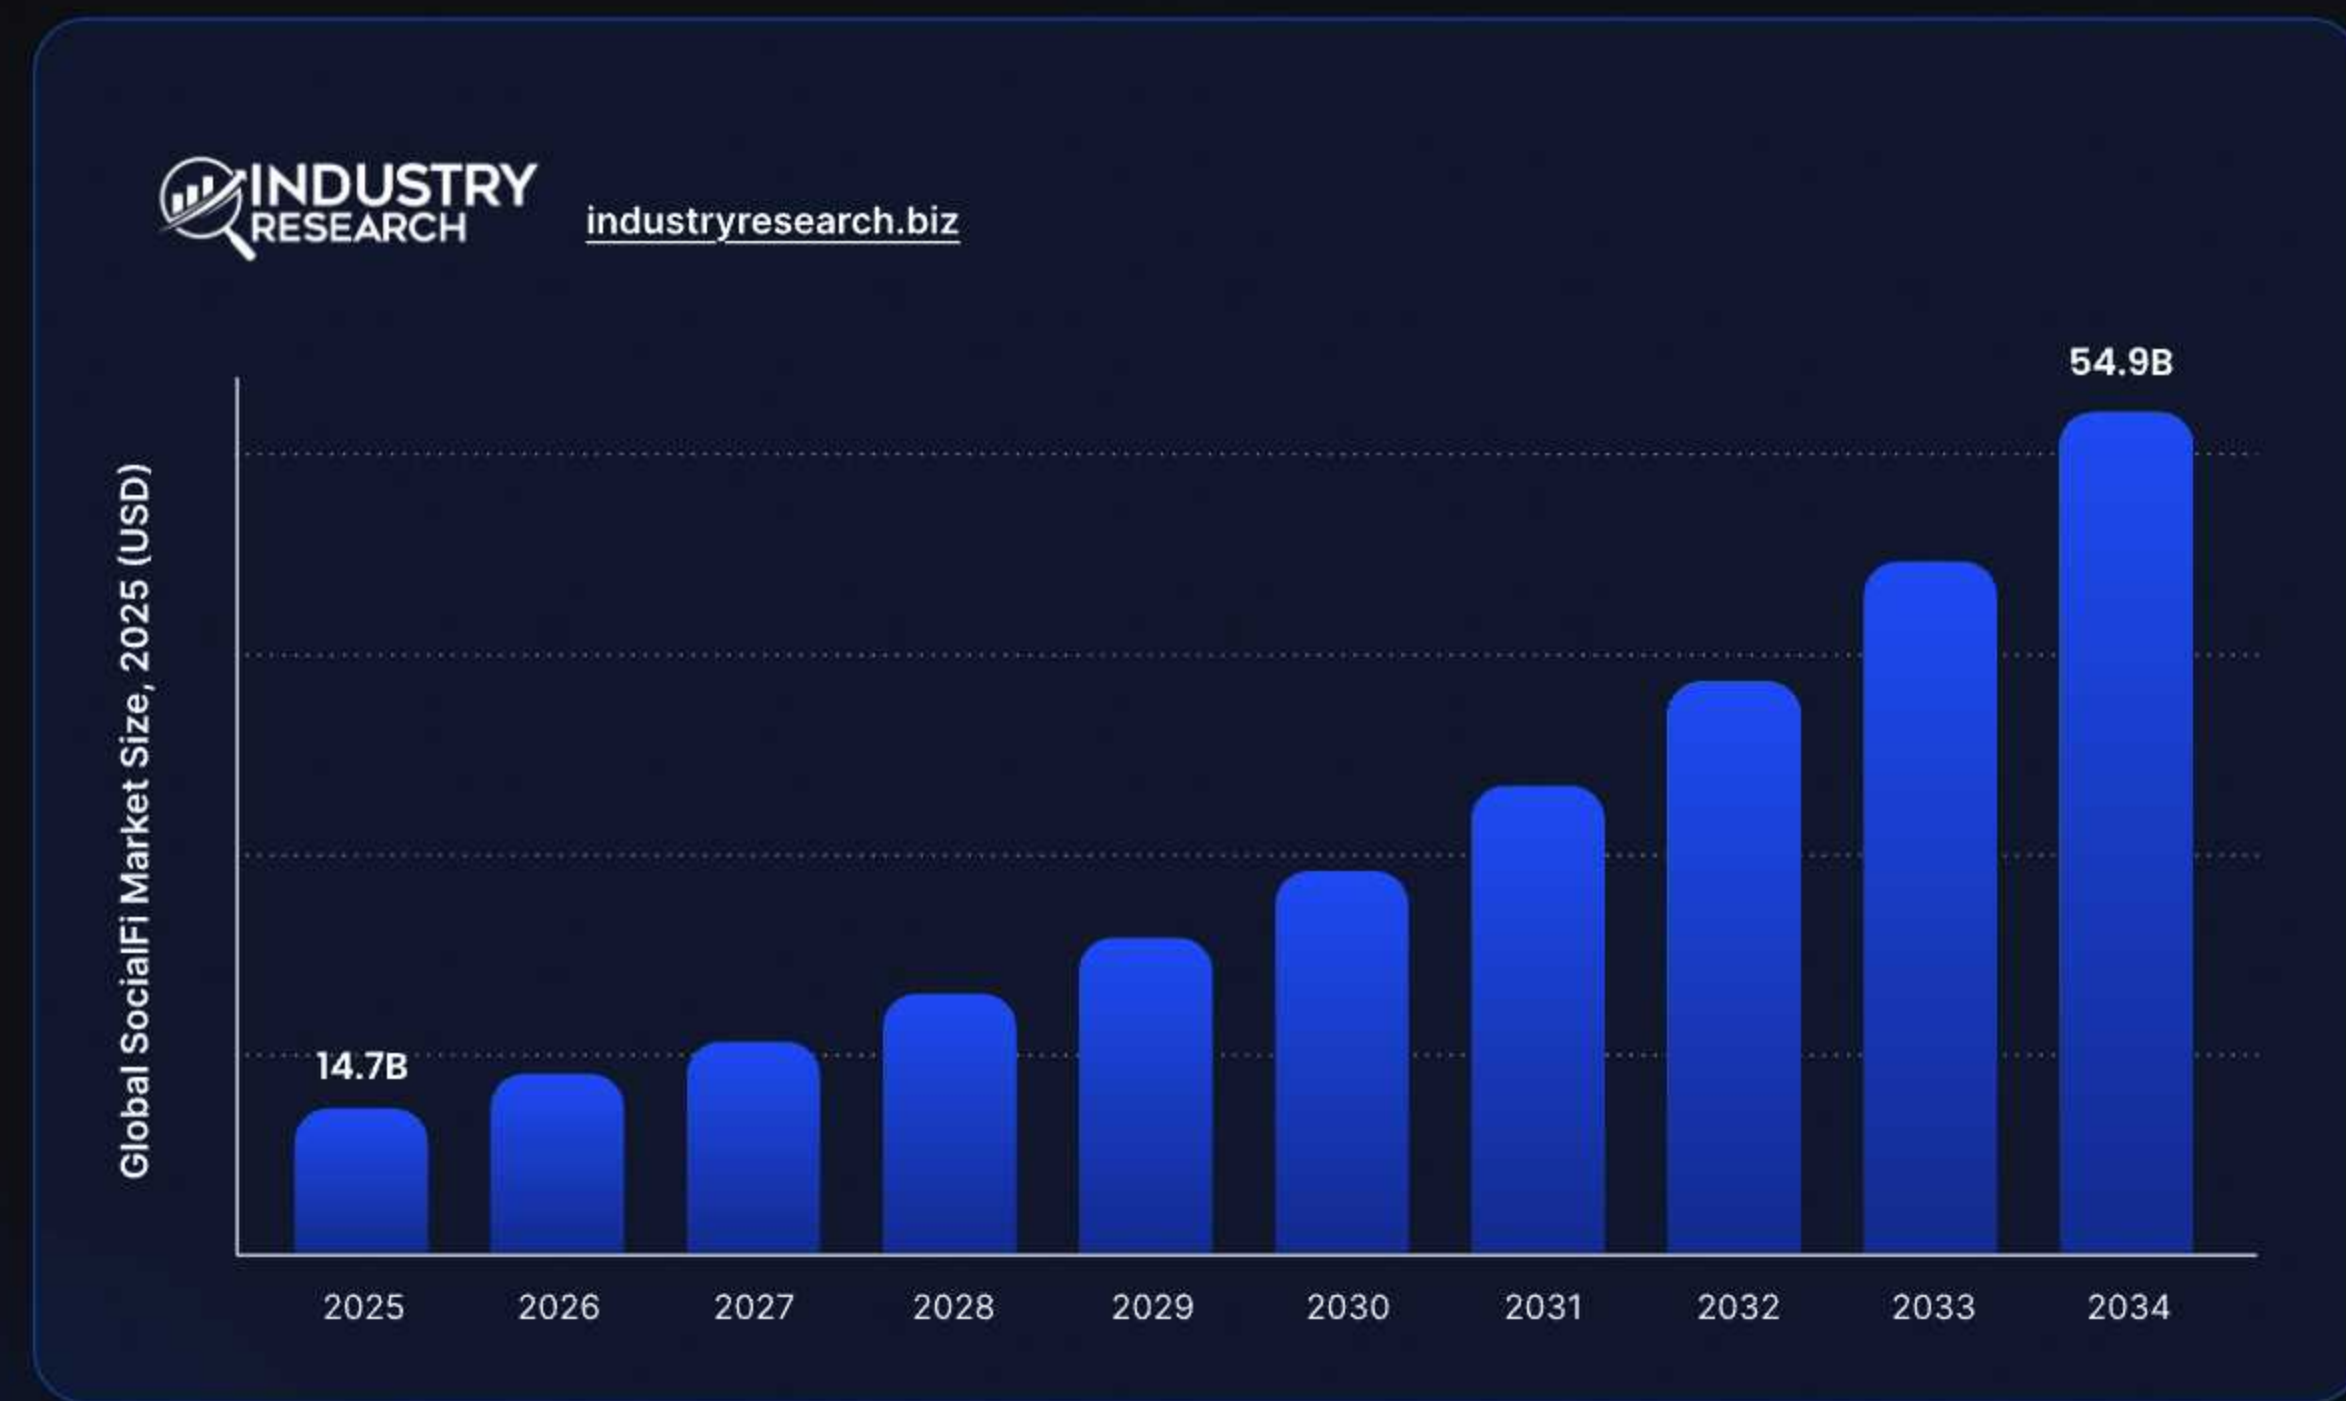

# Streaming Market Overview

- The global live video streaming market is projected to grow from \$107B in 2025 to \$416B by 2030 at a ~21.9% CAGR.

# SocialFi Market Overview

- The global SocialFi market size is estimated to be \$14.7B in 2025 and is expected to hit \$54.9B by 2034 with a CAGR of 15.71%.
